

DCM-backed JasperSoft, PayCycle and PGP Named to JMP's "Hot 100" Report

VC Index ranks DCM among Top 30 venture capital firms investing in leading private software companies

MENLO PARK, Calif., June 26, 2009 — Early stage venture capital firm [DCM](#) today announced that three of its portfolio companies [JasperSoft](#), [PayCycle](#) and [PGP Corporation](#) have been recognized as top 100 private software companies by JMP Securities, a San Francisco-based investment bank. The annual report entitled "Hot 100: The Best Privately Held Software Companies" highlights leaders in the software industry as identified by the software research team at JMP Securities in the categories of application software, infrastructure software and analytics and data integration software.

Companies included in the Hot 100 report were selected in recognition for their products and services as well as corporate growth. For the first time, the report also includes a venture capital index which recognizes more than 180 venture capital firms that invested in the Hot 100 software companies. DCM ranked among the top 30 firms that have invested in three or more software leaders in this year's Hot 100.

"This recognition highlights the strong execution of our portfolio management teams and the high standard of excellence that these leaders provide in their respective sectors," said Carl Amdahl, general partner at DCM and board member of PGP Corporation. "DCM's focus is to partner with the best entrepreneurs creating disruptive solutions and this recognition helps validate the underlying strength of our portfolio. Our award-winning portfolio companies are innovators that shape our future through their vision and leadership, and we congratulate all three of the teams for their achievements."

On the JMP Hot 100 List for the second year in a row, JasperSoft is the market leader in open source business intelligence and the most widely used business intelligence software in the world. With more than eight million total product downloads worldwide, more than 91,000 registered developers and 10,000 commercial customers in 96 countries, the company has made a positive and disruptive impact on the business intelligence market. According to surveys by Gartner and IDC, business intelligence has been the top-ranked IT priority for the three past years and open source continues to be one of the fastest growing trends in the software industry.

PayCycle is America's number one online payroll service, serving more than 85,000 small businesses. PayCycle provides an easy-to-use, innovative, efficient service for small businesses, backed by outstanding customer support. PayCycle also provides payroll services for leading financial institutions including Capital One and PNC Bank, and provides client payroll services through many of the nation's accounting professionals.

PGP Corporation is a global leader in email and data encryption software for enterprise data protection. Based on a unified key management and policy infrastructure, the PGP® Encryption Platform offers the broadest set of integrated applications for enterprise data security providing data protection via encryption applications for email, laptops, desktops, instant messaging, smartphones, network storage, file transfers, automated

processes, and backups. PGP® solutions are used by more than 100,000 enterprises, businesses and governments worldwide.

In addition to the “Hot 100”, the three companies have been acknowledged through numerous awards for outstanding technical and professional achievements as well as contributions to the software industry.
